

Chanchal Prajapati

[USER EXPERIENCE DESIGNER]

I'm a user experience designer. I uncover insights, curate design-led business strategies & design empathic experiences. I'm passionate about humanising technology & making it accessible - one experience at a time.

In my latest work experience at Samsung, I have worked across Samsung's diverse portfolio - SmartPhones, Home Appliances, Smartwatches and new product innovations. With the expertise to deeply understand the socio-cultural / economic / political landscape of consumer markets, I have led global research and projects to create locally inspired global consumer experiences.
